Sleeps Endymion, Perhaps to Dream

ballet - pantomime

JACK PARTON

1997, *revised* 2026

Instrumentation

Flute (doubling Piccolo)
Clarinet in E♭
Clarinet in B♭
Bass Clarinet in B♭
Alto Saxophone in E♭
French Horn in F
Harp
Violin
Viola
Violoncello
Contrabass

Duration: ca. 18 minutes

Originally scored for these eleven instrumentalists, ***Sleeps Endymion, Perhaps to Dream*** can also be performed with a small string section, perhaps (including the solo players) of 6 violins, 5-6 violas, 4-5 'cellos, and 3 basses.

Sleeps Endymion, Perhaps to Dream was completed at Peabody Conservatory in Baltimore in winter of 1996-97. In May of that year it was premiered as the concluding work on my senior recital in partial completion of my undergraduate studies. In stubborn defiance of a composition faculty which at one extreme tolerated tonal writing (barely) and at the other openly disparaged and ridiculed it, I threw every creative skill and technique I could muster into this score while still writing something far more affective than merely effective. Rhythmic and tempo fluidity, polyrhythm, polymodality, embedded sonata forms, all manner of counterpoint, polychromatic and thematically-organised orchestration... Thanks in no small part to eleven excellent friends whose initial agreement to play on my recital dictated the instrumentation, this first performance was well-received and earned top marks. However, due to the all-hands-on-deck manner of writing coupled with the haste to finish score and parts before reheasals had to begin, even then I acknowledged that the score was one colossal glorious mess. Moreso, as everything I'd had in me creatively had been poured into the score, I knew I'd have to step away from it for a time before I could start pulling it apart and repairing it.

In 1999 a dancer friend expressed interest in choreographing *Sleeps Endymion*. This first attempt to rectifiy the score really didn't progress much beyond correcting muddy harmonic voicings, glaring intonation collisions between instruments, and simplification of the writing for the harp. The most substantive change was made when I understood I had at my disposal a small orchestra. To utilize as many available players as possible I added the *ad libitum* string parts. Certain passages still called for the solo player, and in those moments when the *gli altri* play something different, they are notated on a lower, smaller staff, and otherwise "solo" and "tutti" are indicated in the one primary staff. When playing with only the four individual instruments, the smaller second staves can simply be ignored. This version was played the one time, in September 1999, to a lukewarm reception. At that time I decided that the score was perhaps simply too complicated for further dance use, and the score and parts were boxed away.

Finally, during COVID pandemic lockdown I began to revisit my "juvenalia", typesetting those scores dating from before 1997 and almost all still in pencil-and-paper manuscipt, editing and revising them as I went. *Sleeps Endymion* was a work I'd always been proud of despite its deficiencies, and so it was one I'd been particularly eager to tackle. Unraveling, clarifying, and simplifying the score however proved a slow intermittent process. Six years later I am now finally satisfied that this is the music I'd wanted to write thirty years ago.

The two movements reflect two stanzas from an epic poem I'd attempted to compose during my first undergraduate years at Atlantic Union College. This was a parody of Edmund Spenser's ***The Faerie Queen.*** The narrative revolved around the ardent wooing by a gallant and chivalrous moose "Pampel" for a lovely but disinterested and unreachable cow (whose name I could never quite satisfactorily devise). This was inspired by an incident in Shrewsbury, Vermont in the autumn of 1986: for three months a lovelorn moose dubbed "Josh" wooed a bemused or disinterested domestic cow named Jessica. Their doomed courtship made national news on a nearly daily basis. Inspired by this, in nine-line Spenserian stanzas liberally peppered with jokes and atrocious puns I began writing of Pampel's ardent, well-intended, clumsy, heartmeltingly sweet, and inevitably futile efforts to gain the favor of his uddered lady. In moments when I wanted to express something more heartfelt or descriptive, however, I found it pleasing to sidestep into sonnets and a more expressive poetic voice. I never completed the cycle, perhaps for the best, and the notebook is long lost. However, these two sonnets caught the eye of a friend who then composed song settings for baritone and piano for them, and to whom I have to thank for preserving the texts.

XVIII.

Upon that hill, like Latmos' Sun-bath'd height,
There lies a grove where seldom day might seep
'Twixt cedars, showing Philomel take flight,
Arachne spin, and age'd Tythonus leap.

Here ***sleeps Endymion, perhaps to dream***
Of steep ascent to halls of opal light,
Of grace to dance the old celestial theme
And parley with the argent Queen of Night.

What fell enchantment causes him to deem
Her coming such a promise of delight
That he so sore neglect his crook and sheep?
He waits for aye to see her silver beam
Across the threshold fall, and yet in spite,
He slumbers, ever smiling in his sleep.

XIX.

Now in the dawning sky Selene appears,
Her silver car by sable panthers drawn,
Their malchite eyes alit with lapis dawn,
Descending from their path among the spheres.

Her chariot slows to halt upon the lawn;
Her host, a glitt'ring company as much
Comprised of heav'nly sprites as creatures such
As pace the night, obiesce and quick are gone.

She 'lights, and casting off her robes of fur
She lies beside him on the mossy couch.
He yet sleeps on; she gently calms her fears.
She speaks, and calls his name. He does not stir;
And finding him unwaking at her touch,
She bathes him with her kisses and her tears.

from ***The Daerie Queene***
text by the composer (1990)

Sleeps Endymion, Perhaps to Dream
